Voltage and VAr Support in System Operation

WG C2.13

Table of Contents

EXECUTIVE SUMMARY	3
CHAPTER 1	5
INTRODUCTION	5
<i>List of Symbols</i>	6
<i>List of Acronyms and Terminology</i>	6
CHAPTER 2	8
ON MAINTAINING A GOOD VOLTAGE PROFILE IN STEADY-STATE AND TRANSIENT SITUATIONS	8
2.1 How to maintain a good Voltage profile	8
2.1.1 What controllable/switchable reactive power sources are available	13
2.1.2 Control schemes	15
2.1.2.1 The hierarchical control scheme	15
2.1.3 Examples	17
2.1.3.1 The Slovenian Control Scheme	17
2.1.3.2 The Chinese hierarchical control scheme	17
2.1.4 TSO and DSO interaction	22
2.1.4.1 The MAVIR system U/Q control	24
2.1.4.2 The current Swissgrid practice	26
2.2 Impact of current and future trends	26
2.2.1 An introductory example: Current situation and perspectives in Slovenian Electric Power System	26
2.2.1.1 Problems in Slovenian Electric Power System	27
2.2.2 Wind power: the example of Germany	28
2.2.3 Higher and more volatile transits: the example of China	30
2.2.3.1 Impact on Steady Operation	30
2.2.3.2 Impact on Transient Stability	31
2.2.4 Underground cables	32
2.2.4.1 Current and future power cable technology	32
2.2.4.2 HV and EHV cable characteristics	32
2.2.4.3 Reactive power compensation	34
2.2.4.4 Voltage profile in steady state	34
2.2.4.5 Transient voltages and currents	34
2.2.4.6 Load sharing	34
2.2.4.7 DC HV cables	35
2.2.4.8 Summary	35
2.2.5 HVDC Links	35
2.2.6 FACTS	36
2.2.7 Incentives for producers and markets of reactive power: the example of Poland	36
CHAPTER 3	37
3.1 Voltage depressions	37
3.1.1 Protection against voltage depressions	39
3.1.2 Fast capacitor switching	39
3.1.3 Under-voltage load shedding	39
3.2 Instabilities	40
3.2.1 Introduction	40
3.3 Voltage collapse	40
3.3.1 Diagnosis	40
